+ OUR DOCTOR

Dr. Ghodsi, founder of Lasting Smiles Dental Implant Centers, **has over 30 years of experience** in dentistry and is one of the few **offering a lifetime warranty on dental implants**.

Born and raised in California, he earned his **bachelor's degree in Pharmacology from UC Santa Barbara** at just 20 years old, then his DDS from USC in 1988, where he also served as a faculty member.

Achievement

Since then, he has led a **successful private practice, specializing in comprehensive care, All-on-4® implants**, and sedation dentistry, serving patients in **Orange County and Las Vegas with cutting-edge solutions**.

WORLD'S TOP 100 DOCTORS

PRESENTED BY GLOBAL SUMMITS

Dr. Sharam Ghodsi

THE TOTAL TREATMENT TIME

This treatment from start to finish will be **4 full business days**. We need to see you for an appointment to collect our diagnostic and treatment records **at least 1-day full day** prior to your scheduled surgery.

DAY ONE

Consultation, Diagnostic
and Laboratory Records

DAY TWO

Surgery and Post-operative
Laboratory Records

DAY THREE

Delivery of Long-term
Provisional Fixed Teeth

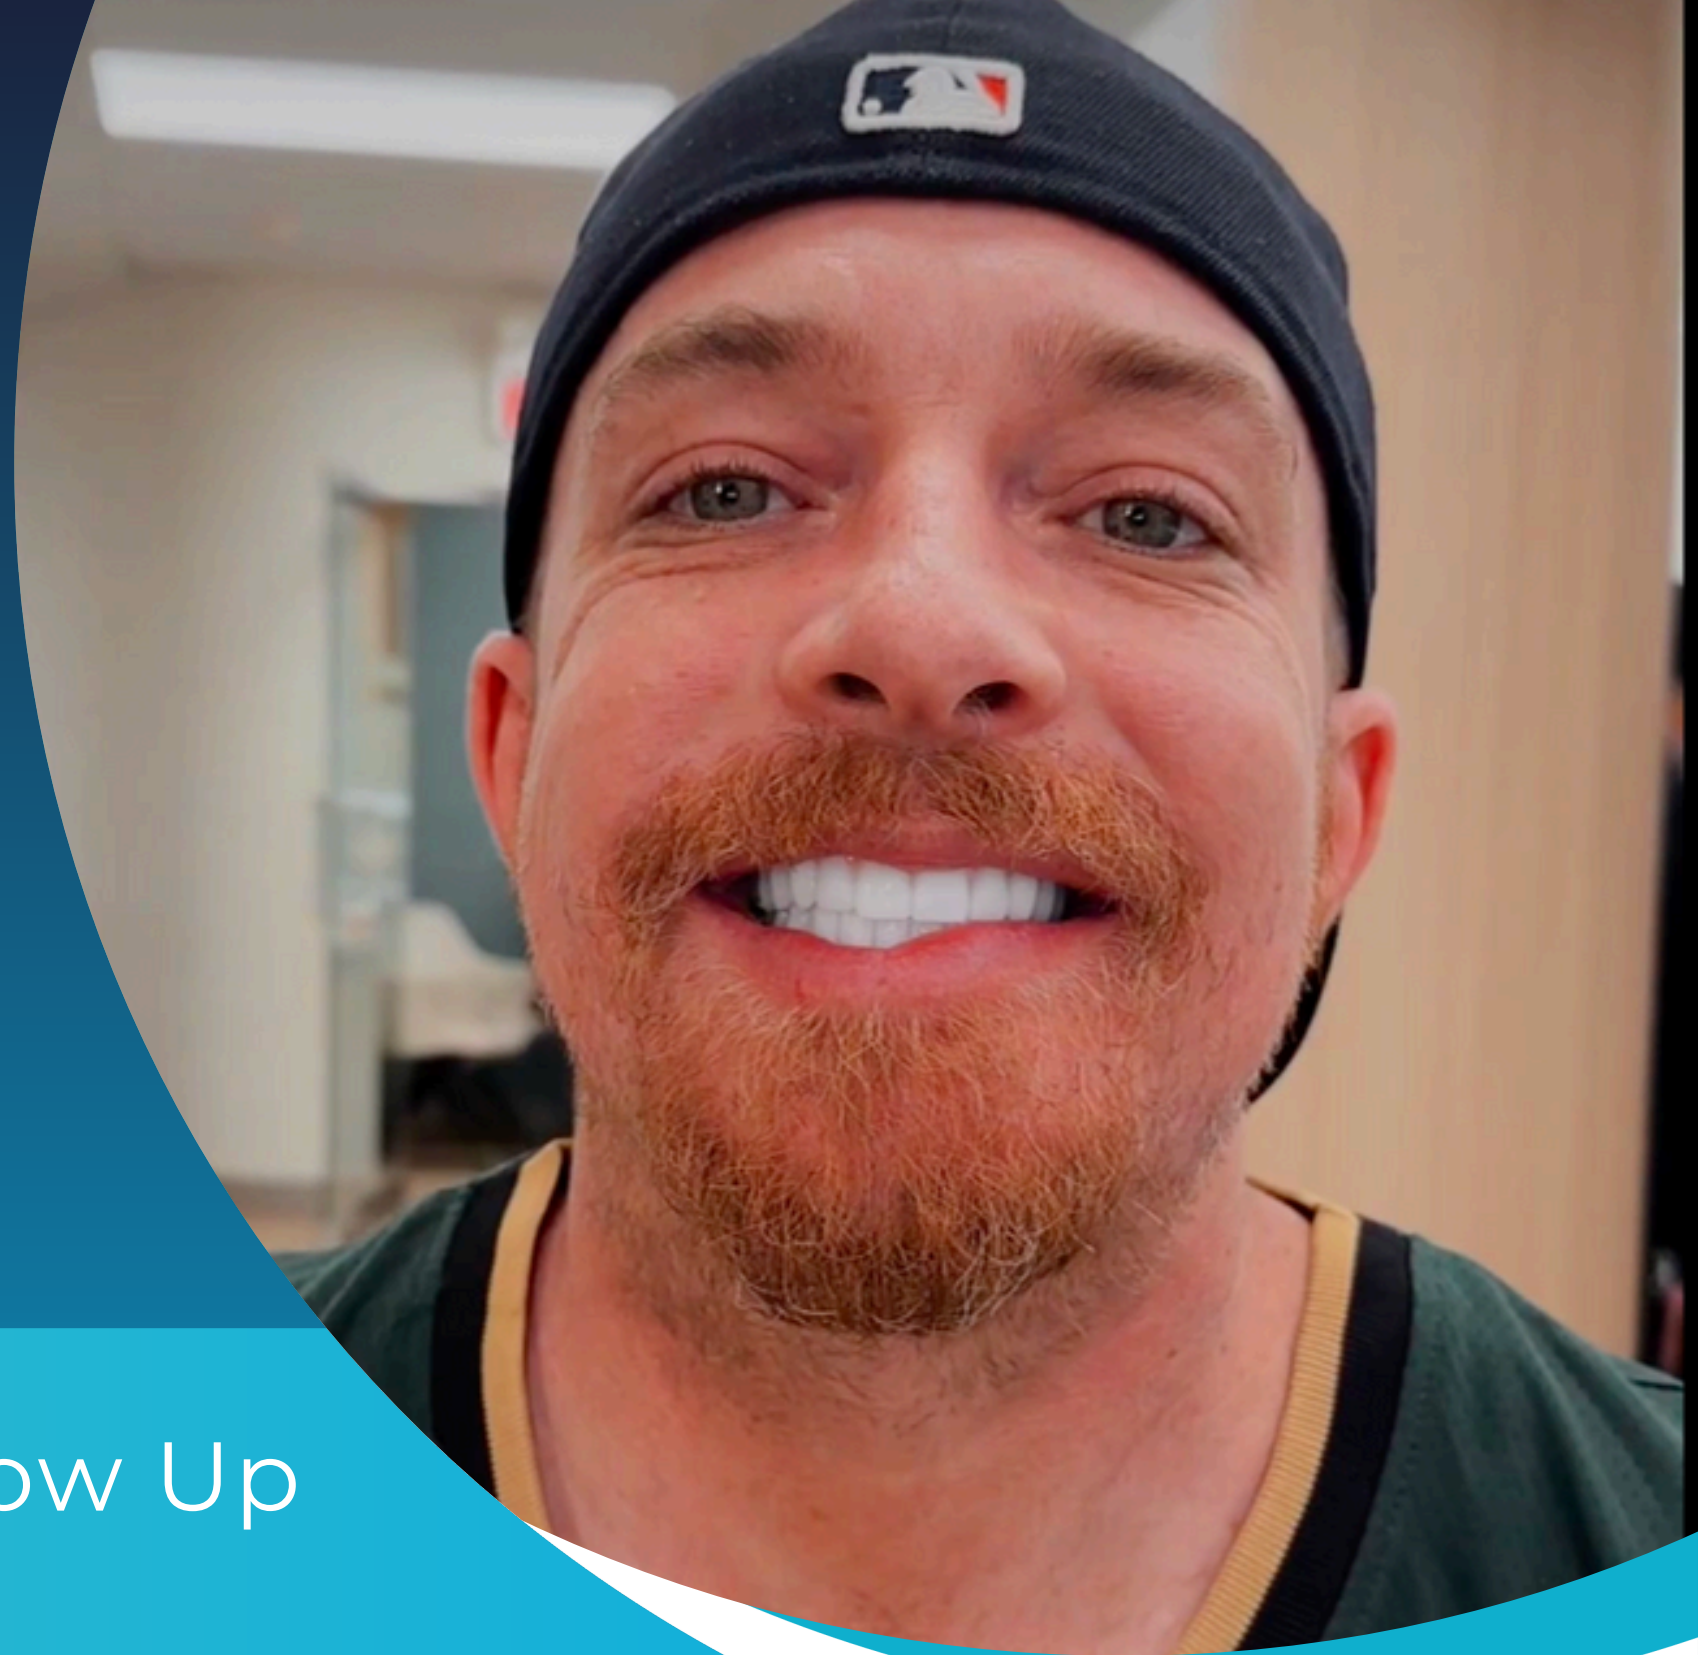

DAY FOUR

Bite and Smile Follow Up

The prosthesis

The long-term **provisional prosthesis** will be made of a titanium bar frame with PMMA (polymethyl methacrylate) teeth structure and will restore your esthetic and function. This fixed prosthesis will be attached to the implants by retaining screws. Guaranteed by Dr. Sharam Ghodsi for **1 year** from the date of delivery.

It is of utmost importance to get the recommended/desired stability of the implants prior to attaching the long-term provisional fixed teeth. If the stability of the implants is not achieved, we will provide you with a removable prosthesis until the implant healing is complete, then will process with fabrication and delivery of the long-term provisional prosthesis.

Healing may take
up to 4-6 months.

What happens after
your surgery

After delivery of your implant-supported
fixed teeth, you will be **given oral hygiene
instructions and diet instructions that
must be followed for successful healing.**

It is recommended that you come into our
office after six months for a checkup and cleaning

During checkup and cleaning visits we **evaluate the following to ensure** we help achieve the best possible outcome for your case.

Occlusion

Night guard compliance
Oral Hygiene

Proper Eating Habits Stress areas on
the teeth The health of the implants

Smoking habits

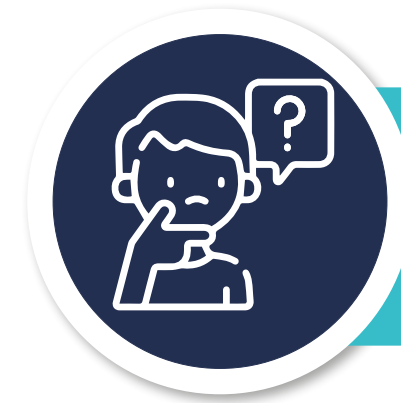

IMPLANTS

GUARANTEE

Dr. Sharam Ghodsi will guarantee the implants for 1 year from surgery if you present 6 months post-operatively for examination and cleaning. If you do not return for a follow up visit, there will be no guarantee made on your implants.

Dr. Saeid Mohtashami will guarantee the prosthetic for 1 year from the delivery.

To consider

Non-compliance can lead to implant failure or damages to the prosthesis. **Failure to comply with daily use of the night guard, poor eating habits, poor oral hygiene and continuing to smoke after implant placement will void your implant and prosthesis guarantee and result in additional fees.** Diabetic patients must show evidence of an A1C level below 7 for this treatment and to maintain any guarantees.

Additional services

During your consultation, your CT scan will be evaluated by an experienced dentist. In rare cases, due to individual anatomical limitations, **additional services that are not included in the above stated plan may be necessary to complete the rehabilitation.** If these apply to you, you will be presented with an additional treatment plan itemizing any additional fees not previously discussed. Additional services that may be necessary for your rehabilitation which are not included in the above are as follows:

- **IV sedation** - \$1,500

- **Sinus Lift:** - \$1,500 per left or right side.

- **Additional endosteal implant w/multiunit abutment:** \$2,800 each

- **Zygoma implant upgrade from endosteal:** \$2,000 each
